

BOX CULVERT SOLUTIONS

OVERVIEW

Civilcast is a privately owned and operated company, dedicated to the manufacture and distribution of precast and steel products designed to meet the diverse needs of civil construction applications.

Our proficiency spans stormwater, water, sewer, infrastructure, electrical and communication products within the civil construction sector.

Our reputation in the industry has been built on providing exceptional service coupled with:

-  **Large stocks**
-  **Fast lead times**
-  **Expert advice**
-  **Compliance assured**
-  **Custom solutions**

Through our extensive network of branches across New South Wales, Queensland and Victoria, we deliver exceptional service backed by experienced local teams. Each location is supported by dedicated operations specialists committed to ensuring efficiency, reliability and outstanding customer support.

BOX CULVERTS

Civilcast precast box culverts offer a fast and cost-effective structural solution for a variety of civil applications, including road crossings over waterways, flood-prone areas and underground service corridors.

They can also be configured as inverted culverts with roof slabs for electrical installations. Our in-house Engineering and Design team is available to work with you to develop the most effective solution for your project.

Civilcast culverts are also TfNSW Approved.

FEATURES & BENEFITS

-  **Fast Cost Effective Installation**
Precast design reduces on-site time and lowers project costs.
-  **Durable & Reliable**
Engineered for long term performance in flood, road and underground applications.
-  **Tailored Solutions**
Custom and standard designs to suit your site needs.
-  **Expert Support**
In house Engineering & Design team provides guidance to ensure the right solution for your project.
-  **TfNSW Approved**
Approved for use by Transport for NSW, providing confidence that the product meets recognised industry standards.
