BOX CULVERTS

Civilcast's Precast Box Culverts are a quick, cost-effective structural solution for various applications including road crossings over waterways and flood prone areas, housing of underground services etc.

Base slabs and link slabs are also available upon request. Civilcast Culverts can also be used as inverted culverts with link slabs for electrical applications.

		SPAN (mm)									
		450	600	900	1200	1500	1800	2100	2400

	2100							✓	✓	✓	✓
	2400									✓	✓

*Leg thickness varies according to the height of the culvert. Drawings of required sizes are available upon request. Designed & Manufactured to AS1597. Where design requirements are outside of or greater than the parameters of AS1597, structural design and detailing to be provided by project engineer.

Denso Tape

- Synthetic fabric based tape impregnated and coated with an adhesive petrolatum compound.
- High conformability with strong adhesion
- Resistant to acids, alkalis and salts.
- Tape must be firmly pressed in all angles, corners and along flat surfaces to prevent air pockets, bridging and stretching.
